

# A new take on home cinema

Scores soar. Details dance. Spaces transform. With Beovision Theatre, you're not just watching cinema – you're living it.

Front and centre. Every night. Beovision Theatre is our complete cinematic experience for film lovers. Crystal-clear 4K screen. Room-filling, Dolby Atmos-ready sound. And your cables? Tucked away.

Four patent-pending acoustic innovations in one sleek cabinet envelop you in sound from every angle. Made with materials as beautiful as they are durable, Beovision Theatre is made to last for generations

## Why you'll love it

-  Sound that surrounds
-  All beauty. No clutter
-  For generations to come

**Technical**

**CABINET PRINCIPLE**

Closed cabinet

**LOCAL BUTTONS**

Volume up/down, Play/pause,

## Product Description

### A new take on home cinema

A technological and aesthetic masterwork, years in the making. Made for years to come.

Featuring four patent-pending Bang & Olufsen acoustic innovations, Beovision Theatre is the world's first single soundbar that delivers the immersive surround sound, clarity of speech and serious bass previously only possible with multi-speaker setups.

One beautiful, sculptural piece allows any TV screen to be slotted in, with all cables cleverly hidden away. Distracting tech clutter? It's a thing of the past.

Prepare to turn your TV into a work of art and transform every movie moment into an unmissable cinematic event – elevated beyond what should be possible.

## Key Selling Points

### Eyes front. Ears everywhere.

When you hear every detail from every angle, you're not just watching a movie. You're in it.

Experience immersive Dolby Atmos surround sound and impactful bass without the need for extra boxes. Hear things above, below and to the sides in 3D space with absolute fidelity. A coaxial centre channel ensures crystal clear speech, so you won't miss a word or whisper. The way it should be.

All this power in one sleek, sculptural piece that integrates seamlessly with any TV – and it only takes a minute to set up. Enjoy a cinematic experience as the director intended, right at home.

### No clutter. No compromise.

Technology should liberate your listening experience, not take over your home. Beovision Theatre follows this mantra by not making you compromise design for sound quality, breaking the mould of what's possible. This single, sleek soundbar delivers an immersive home cinema experience without the usual bulky black boxes and chaotic cables.

You can slot almost any TV into Beovision Theatre, so you won't need to replace it if you decide to update your screen. It's also made to integrate with your interior through multiple customisation options. In true Bang & Olufsen style, we designed

Beovision Theatre like a boat's keel, sitting atop an aluminium blade to give the impression that your TV is floating in the air. A touch of magic that also serves a purpose: cleverly hiding cable clutter to present one fluid, beautiful form.

Smart. Stylish. Simple. All you need is one speaker to bring the cinema home.

### Evolves over time.

Good things never last? Beovision Theatre proves otherwise. It's designed to be updated instead of replaced, with software that can evolve over time to bring new features. Time for a bigger screen? Slot a new one in. This modular approach means Beovision Theatre will continue to deliver a spine-tingling cinema experience for years to come.

Beovision Theatre is built on cutting-edge audio technology, but it also respects the past. You can connect it with classic Bang & Olufsen speakers stretching back to the 80s, bringing a new lease of life to your most loved pieces and elevating them to a multichannel sound experience.

This is next generation listening. For generations to come.

# Style it to your space

No black boxes blocking the screen.  
No cables cluttering up your space.

This is stunning home cinema sound made simple. Whether wall mounted or poised on its stand, Beovision Theatre integrates with almost any TV through elegant, adjustable screen interface that creates a perfect silhouette for every set.

Wherever you place it, it's perfectly positioned to bring cinema to life.
