Torsten Valeur, Valeur Designers

**PATENT**

Bang & Olufsen has a pending patent on the mechanism providing the movement of the speaker covers where the close gap between the covers stays the same during the whole movement, which gives a surprising effect

## Product Description

### Exceptional Bang & Olufsen sound paired with the best OLED picture performance

The iconic Bang & Olufsen cinematic sound performance is delivered through a 3-channel speaker system with great speech intelligibility and power. Paired with this outstanding sound, is LG OLED technology, acknowledged for its ability to create absolute black and stunning contrasts, which make for an immersive cinematic experience that is second to none.

### Striking design combined with magically choreographed movement

With the new large screen Beovision Harmony concept, Bang & Olufsen has reduced the visual presence of the TV. When in standby or audio mode, the TV screen is positioned close to the floor and partly covered by the speaker system, making the TV screen less dominant in the room. When switched on, Beovision Harmony unfolds and shows off its full potential in a magical movement.

### Combining wood, fabric and aluminium with meticulous attention to details

The speaker cover system “complements” the dark TV screen “with its” domesticated and furniture-like materials which gives a warm appearance with elegant details. The usage of natural wood or textured fabric combined with precise aluminium leads to a perfect cohesion between Beovision Harmony and Beolab speakers.

### Ease-of-use at its heart

The Beoremove One provides one-touch access to the Bang & Olufsen experience. This, combined LG’s webOS SmartTV function, ensures convenience in the daily use of your complete A/V setup. You can also make a ‘favourite’ with the OneTouch Button and get direct access to favorite TV channel or content app.

### Built for multiroom music experiences

Uncompromised sound quality with Google Cast and Apple AirPlay. Bluetooth for quick and easy streaming throughout your home.

Soundcenter speaker  
cover options:
